On the expectation of the norm of random matrices with non-identically distributed entries

Carsten Schütt *
schuett@math.uni-kiel.de

Let $X_{i,j}$, $i,j = 1,\dots,n$, be independent, not necessarily identically distributed random variables with finite first moments. We give estimates for the expectation of the norm of the random matrix $(X_{i,j})_{i,j=1}^n$.

This is joint work with Stiene Riemer.
