

“POINTS RATIONNELS, COURBES RATIONNELLES ET COURBES ENTIÈRES SUR LES VARIÉTÉS ALGÈBRIQUES”
3–28 JUIN, 2013

Programme thématique :

RATIONAL POINTS, RATIONAL CURVES AND ENTIRE HOLOMORPHIC CURVES ON ALGEBRAIC VARIETIES
JUNE 3–28, 2013

Thematic program:

The Thue–Siegel method in diophantine geometry

Paul Vojta *

vojta@math.berkeley.edu

This mini-course will describe the Thue–Siegel method, as used in the proof of the Thue–Siegel–Roth theorem. It will also (partially) describe adaptations of the method to algebraic geometry and Arakelov theory, which gave alternate proofs of the Mordell conjecture.

*Department of Mathematics, University of California at Berkeley, 970 Evans Hall #3840, Berkeley, CA 94720-3840, USA.
