"ABECEDARIAN OF SIDE (ASIDE)"
JUNE 27 — JULY 1, 2016

SESSION—Lattices and symmetries in physical applications

Milosz Panfil (Warsaw University)

TITRE/TITLE : "LATTICE INTEGRABILITY AND THE XXX MODEL"

The goal of these lectures is to provide a friendly introduction to integrable lattice models. We will use standard techniques of the Algebraic Bethe Ansatz and Quantum Inverse Scattering. The focus will be placed on computing physically relevant information.
