

Atelier : Les femmes en mathématiques à l'époque de la COVID  
8 mars 2021

Workshop: Women in Mathematics during the time of COVID  
March 8, 2021

**Lillian Pierce**  
(Duke University)

**March, April, May, ..., March**

---

Our personal life and our intellectual life always exist in close proximity. This has been especially true since the start of the pandemic. As a result, the mathematics I have been able to do during the pandemic occurred in quite distinct stages, month by month. I will follow this chronology to lightly sketch a range of projects in mathematics research (spanning analytic number theory and harmonic analysis), as well as projects associated with the mathematical life but different from the work I would attempt in a typical year.
