The MPE2013 initiative provides a most attractive framework for activities fitting the scope and mission of the the Committee on Probability and Statistics in the Physical Sciences of the Bernoulli Society (C(PS)2) in several ways, combined with a parallel initiative of Bernoulli Society to recognize 2013 as an International Year of Statistics, which also will be celebrated as the 300th anniversary since the publication of *Ars Conjectandi* by Jacob Bernoulli. In this multifaceted prospect, C(PS)2 aspires to represent participation of the Bernoulli Society in the MPE2013 initiative.

To that end, C(PS)2 proposes the organization of joint C(PS)2-MPE2013 special sessions in two major conferences scheduled for 2013. Namely, in the 36th Conference on Stochastic Processes and their Applications (SPA 2013, <http://euclid.colorado.edu/~hilljb/spa2013/local-organizing-committee>), to be held in Boulder, Colorado, July 29 - August 2, 2013 and in the 59th World Statistics Congress of the International Statistical Institute (ISIWC-2013, <http://www.isi2013.hk/>) to be held in Hong Kong, China, August 25-30, 2013.

Both of these forthcoming events represent institutions with a long history, importance, prestige and visibility within the statistical and the broader scientific community internationally, ensuring a high impact and visibility of the MPE2013 initiative as well.

Additionally, C(PS)2 intends to represent the MPE2013 initiative in annual meetings of the American Geophysical Union (AGU) and its European counterpart (EGSociety), with the organization of joint C(PS)2-MPE2013 special sessions therein, as well.
