The Institute of Mathematics and its Applications (IMA) is the UK's learned and professional society for mathematics and its applications. The IMA promotes mathematics research, education and careers, and the use of mathematics in business, industry and commerce. Among its activities the IMA produces academic journals, organises conferences, and engages with government. IMA members come from a multiplicity of different organisations. Because mathematics is ubiquitous, so is the membership base.

The Editorial Board of the Institute's bi-monthly members' publication, *Mathematics Today*, will adopt *Mathematics of Planet Earth* as its theme for 2013 and, in addition, will produce a special issue which will focus on *Mathematics of Planet Earth 2013*. The IMA 2013 broad accessibility Conference will also adopt *MPE2013* as its central theme.
