Kaisa Matomäki and Maksym Radziwill awarded the 2019 New Horizon Breakthrough Prize

Montreal, October 22, 2018. - CRM member Maksym Radziwill has just been awarded the 2019 New Horizon Breakthrough Prize, which he will share with Kaisa Matomäki (University of Turku). This award recognises Maksym and Kaisa for their "fundamental breakthroughs in the understanding of local correlations of values of multiplicative functions", achieved while they were both in residence at the CRM during the 2014-15 thematic year in number theory.

Kaisa and Maksym will be honored in a televised ceremony that has come to be known as the "Oscars of Science", on November 4, 2018 at the NASA Ames Research Center in Mountain View, California. Actor, Producer and Philanthropist Pierce Brosnan will animate the evening.

The director of the CRM Luc Vinet and the management of the CRM congratulate the laureates for the outstanding scientific contributions which are being highlighted by this remarkable accolade.
