

Louigi Addario-Berry appointed Deputy Director - Scientific Programs at the CRM

MONTRÉAL, July 2, 2015 /CRM/ - The Centre de recherches mathématiques (CRM) is pleased to announce the appointment of Professor Louigi Addario-Berry as Deputy Director - Scientific Programs. His mandate began on July 1, 2015. Professor Addario-Berry will be joining the Management Committee of the CRM, which includes Professor Luc Vinet (CRM Director), Professor Galia Dafni (Concordia), Deputy Director – Publications, and Professor Odile Marcotte (UQAM and GERAD), Deputy Director - Partnerships.

Louigi Addario-Berry is an associate professor at McGill University. His research is focused on combinatorial and discrete probability. He received his doctorate from McGill University in 2006, jointly in mathematics/statistics and computer science. He then held a Marie Curie Research Fellowship at the University of Oxford and an assistant professorship at the Université de Montréal, before returning to McGill in 2009.

During 2014-2015, Mr. Addario-Berry held a Leverhulme Visiting Professorship at the University of Oxford and a Simons Fellowship at the Newton Institute, University of Cambridge. He had previously held visiting positions at the École Normale Supérieure de Lyon and at École Polytechnique, Université Paris-Saclay.

He joins the Management Committee of the CRM just after completing a 2-year term as the Québec vice-president of the Canadian Mathematical Society.

About the CRM

The Centre de recherches mathématiques (CRM), established in Montreal in 1968, is an institute of international reputation. It promotes research in the mathematical sciences, in the broad sense, spanning pure mathematics (for example number theory or geometry), applied mathematics, statistics, theoretical physics, computer science, mathematical biology, economics, industrial mathematics, etc. This research impacts many aspects of human activity in areas as diverse as public health, finance, climatology, social networks, medical imaging, transportation, and so on. The CRM encompasses thirteen Laboratories of Canadian researchers covering a wide array of fields. In addition, each year, the CRM organizes and hosts a large number of conferences, schools and research activities, in particular through its thematic programs, which are extended periods of focus on topics lying at the leading edge of the discipline. World leaders in their discipline take part in these thematic programs.
